GIO Dental Consulting — a partner for now and continued support

It's not too late!

If you set 2019 practice goals but haven't made much progress in realizing them, it's not too late! Reaching — even setting — goals can be overwhelming. You just need clear direction on your next steps. Since dentistry is what you do best, why not ask for help from a dental practice professional? This will allow you to work smarter not harder on your road to success!

Call me today for a free Overhead Assessment and to discuss how you can have better control and less stress, (847) 650-4531.

You have my sincere gratitude!

Thanksgiving is a perfect time to thank your patients for trusting you with their dental health needs. Consider a Fall event at the office or a nicely written letter to express your gratitude. Whichever is your style, let them know that they are important. And don't forget to thank your team for helping you with your success. Rather than monetary, try showing appreciation with a spa treatment, flowers, theater tickets, or a team outing, etc. I have found that these gestures say much more than just the cash itself.

For all the doctors who have chosen me to help them have a more successful practice: THANK YOU, I am truly grateful for your confidence and loyalty!

Safety first... but how?!

While computers can make your practice more efficient, their ongoing safety maintenance can be expensive and frustrating. With Microsoft ending support on many operating systems in January 2020 and “ransom hacker” malware attacks like the one in August, it’s hard to know how to protect your practice and patient information. This area is definitely out of most dentists’ wheelhouse, but it’s imperative to have someone with experience taking care of this part of your practice.

For a checklist of the recommended items that offer the best protection, contact me today at Jeanne@giodentalconsulting.com or (847) 650-4531.

GIO Dental Consulting provides strategic efficiency planning for dental offices. Our systems increase productivity, patient retention, treatment acceptance, and customer service that builds loyalty and referrals.
